Support made scholarships available to minority and women students interested in engineering and science and significantly increased the number of minority and female students that Missouri S&T can recruit to its science and engineering programs. Recipients of scholarships were also to be exposed to career opportunities in transportation.
Society of Women Engineers (SWE) National Conference:
*October 2007 (National); 5 students; 2 staff
Missouri S&T Society of Women Engineers (SWE) students participated in the National and Regional conferences which are the major events for SWE and one National is one of the largest technical and career conference for female engineers in the country. Each year, the conference attracts nearly 5,000 engineering professionals, students and corporate representatives. The conference is an opportunity for engineering companies and corporations to recruit top talent from SWE membership. It also provides educational, technical and career opportunities for professional and student engineers.

Girls “Lock-In” Conference’s (11-12th grade girls)
*September 28 – 29, 2007 (13 participants)
*February 29 – March 1, 2008 (26 participants)
The conferences gave the students the opportunity to camp out in a residence hall, learn more about studying math, science, and engineering at Missouri S&T, meet other perspective and current students, learn tips for financial aid and admission, and participate in team projects. The conference was designed by students who are members of the Missouri S&T Society of Women Engineers (SWE) and the Women in Engineering and Science Program.

Girl meets Missouri S&T (12th grade girls)
*April 13 – 14, 2008 (12 participants)
This 2-day program is a student recruitment event for female high school seniors and transfer students who have been admitted to Missouri S&T but who have not yet made their enrollment deposit and commitment to attend Missouri S&T. Designed to invite, encourage, promote and support female students to enroll as undergraduate students at Missouri S&T. The recruitment event will allow students to see first hand what life as a female engineering or science student entails and to gain insight into the opportunities available for a successful undergraduate career at Missouri S&T. Visiting campus is the best way for students to get a complete picture of Missouri S&T and its programs. Parents will be invited to attend the event with the student. Students will stay overnight in the residential halls and are matched with current female students who will serve as a peer while on campus.

“girls go green” – 11-12th Grade Girls
*July 27 – August 1, 2008 (20 participants)
This live-in week long camp will give students the opportunity to explore career options that help society while protecting the environment. Students will live in a residential hall, meet current students and professors, participate in team projects and field trips, and gain a better understanding of the science and engineering behind a green environment.
Summer Solutions Camp  (9-10th grade girls camp)  
* June 23 – 27, 2008 (38 participants)  
Summer Solutions Camp is designed to peek the interest of freshman and sophomore high school girls in engineering and science. The one-week program is designed to enable female students to obtain a clear picture of engineering and science as a profession. Several hands on projects are planned to help the students learn more about career options and the demand faced in the fields of engineering, math, and science.

“It’s a Girl Thing” – 7th & 8th Grade Girls  
* June 16 – 20, 2008 (45 participants)  
The program is designed to enable young female students who will be in the 7th & 8th grades during the 2008-09 school term, to help them obtain a clearer picture of engineering and scientific/technological professions. Students will get an opportunity to explore engineering, math, and science through “hands-on” experience. The sessions include laboratory experience, team engineering projects, and time to interact formally and informally with role models and peers. Students become acquainted with various fields of engineering and science and with the demand faced in these fields by practicing engineers and scientists. Another goal is to acquaint students with the type of effort required for college study.

“Expanding Your Horizons… in Math and Science”  
November 9, 2007 (over 500 participants)  
This national program was established by the Math and Science Network in 1976. Missouri S&T implemented the annual EYH conference in 2000 and today has served over 3000 students. Missouri S&T hosted its 7th conference for over 500 young women. This conference is designed to nurture girls’ interests in science and math courses and to encourage them to consider science and math based career options such as engineering, computer science, and biometrics. EYH is an invitation for 7th & 8th grade girls to visit the Missouri S&T campus and attend a keynote presentation by a successful women engineer or scientist, participate in hands-on math/science activities, and interact with female students, faculty and practicing engineers and scientists who serve as positive role models.
